

## 5G O-RAN: Facilitating the Transformation of Channel Operators in Central and Southern Taiwan

## A Wireless 5G O-RAN Studio for Cable TV Interactive Services Engagement

Rich, diversified, and cross-border audio and video contents are the current trend of the industry. A 5G private network can create the necessary audio and video platform for the transformation of channel operators located in Central and Southern Taiwan, providing a foundation for innovation for channel operators through 5G live streaming solutions.

## **Project Results**

**#Strengthening Local Channels** | The first 5G private network includes the entire industry supply chain to drive the development of the local industry.

**#Commercialized Live Steaming Interactions | Broadcasting live** news of local channels through digital set-top boxes provides the elderly with a better viewing experience.
