

# 5G O-RAN: Attend a Concert in Person Without Leaving Home

## Smart Show - 360° Virtual Reality Concert

Concerts attract thousands of fans every year. However, physical performances are definitely subject to space and time restrictions. The high bandwidth, low latency, and multiple connections of 5G can power wearable VR devices to transport people to a different location and create a sense of physical presence.

### Project Results

**#Innovative Experience** | Enjoying live performances through VR terminal devices can promote innovative viewing models of domestic singing groups.

**#Driving the Upstream and Downstream Industries** | Establish an AI interactive model and back end management, introduce VR/MR interactive applications, and obtain sales orders.
